Company Overview

Strategic Indonesian Shareholders

Merdeka is over 50% owned by three strategic Indonesian shareholders

- Saratoga Group (Edwin Soeryadjaya), Garibaldi “Boy” Thohir and Provident Group
 - Permitting, Government & Community Relations, Project Funding
 - Resolved and settled all historical project ownership and forestry issues

Shareholders demonstrated track record with international banks and equity funds via two outstanding IDX listed companies:

- Indonesia’s second largest thermal coal producer, with annual production in excess of 50 million tonnes
- Market Capital of US\$3.48 Billion¹
- Long term customers include all the major Asian based power utilities
- Recently moved to 100% ownership of the world class IndoMet Coking Coal Project (was previously a JV with BHP Billiton)
- Debt providers include major international banks and equity holders include global funds management names
- + 10% owned by the Strategic Shareholders

- Major independent telecommunications infrastructure company, one of the lowest cost Indonesian issuers of corporate bonds
- Market Capital of US\$2.27 Billion¹
- Founded by Provident Group in 2004 and subsequent significant early stage investment by Saratoga Group
- IPO by UBS in 2010 and very strong EBITDA growth delivered yearly
- Debt providers include major international banks and equity holders include global funds management names
- + 50% owned by the Strategic Shareholders

Company Overview

Experienced and Proven Management Team

- **Mr. Colin Moorhead, Chief Executive Officer**

- 30 years mining industry experience, formerly EGM Resources Newcrest Mining Limited
- Heap Leach, Open Pit, Underground, Gold and Gold / Copper experience (Telfer, Gosowong, Cadia / Ridgeway)
- Current President of The Australasian Institute of Mining & Metallurgy (The AusIMM) and former member of The Joint Ore Reserves Committee (JORC) Australia

- **Mr. James Francis, GM Operations**

- 30 years international gold industry experience, formerly GM Copley Mine (Heap Leach), Turkey (Alacer Gold)
- Previously with Newcrest Mining in Indonesia, PNG and Australia

- **Mr. Peter Scanlon, GM Projects & Studies**

- 23 years construction experience mostly with Theiss, (Civil Engineer specializing in heavy civils, mechanical, process and environmental)
- 16 years direct Asian experience (13 years in Indonesia)
- Key strength: Multi-discipline, complex projects in remote locations

- **Mr. Noel Rollo, Mining Manager**

- 40 years international hard rock mining experience
- Specializes in pioneering operations in difficult terrains including Indonesia, Philippines, PNG and West Africa

- **Mr. Karl Smith, Technical Services Manager**

- 30 years plus international hard rock mining experience including North America, West Africa, Australia and SE Asia
- Highly skilled technical services manager specializing in strategic mine planning and resource geology

Tenure

Merdeka's ownership structure is transparent

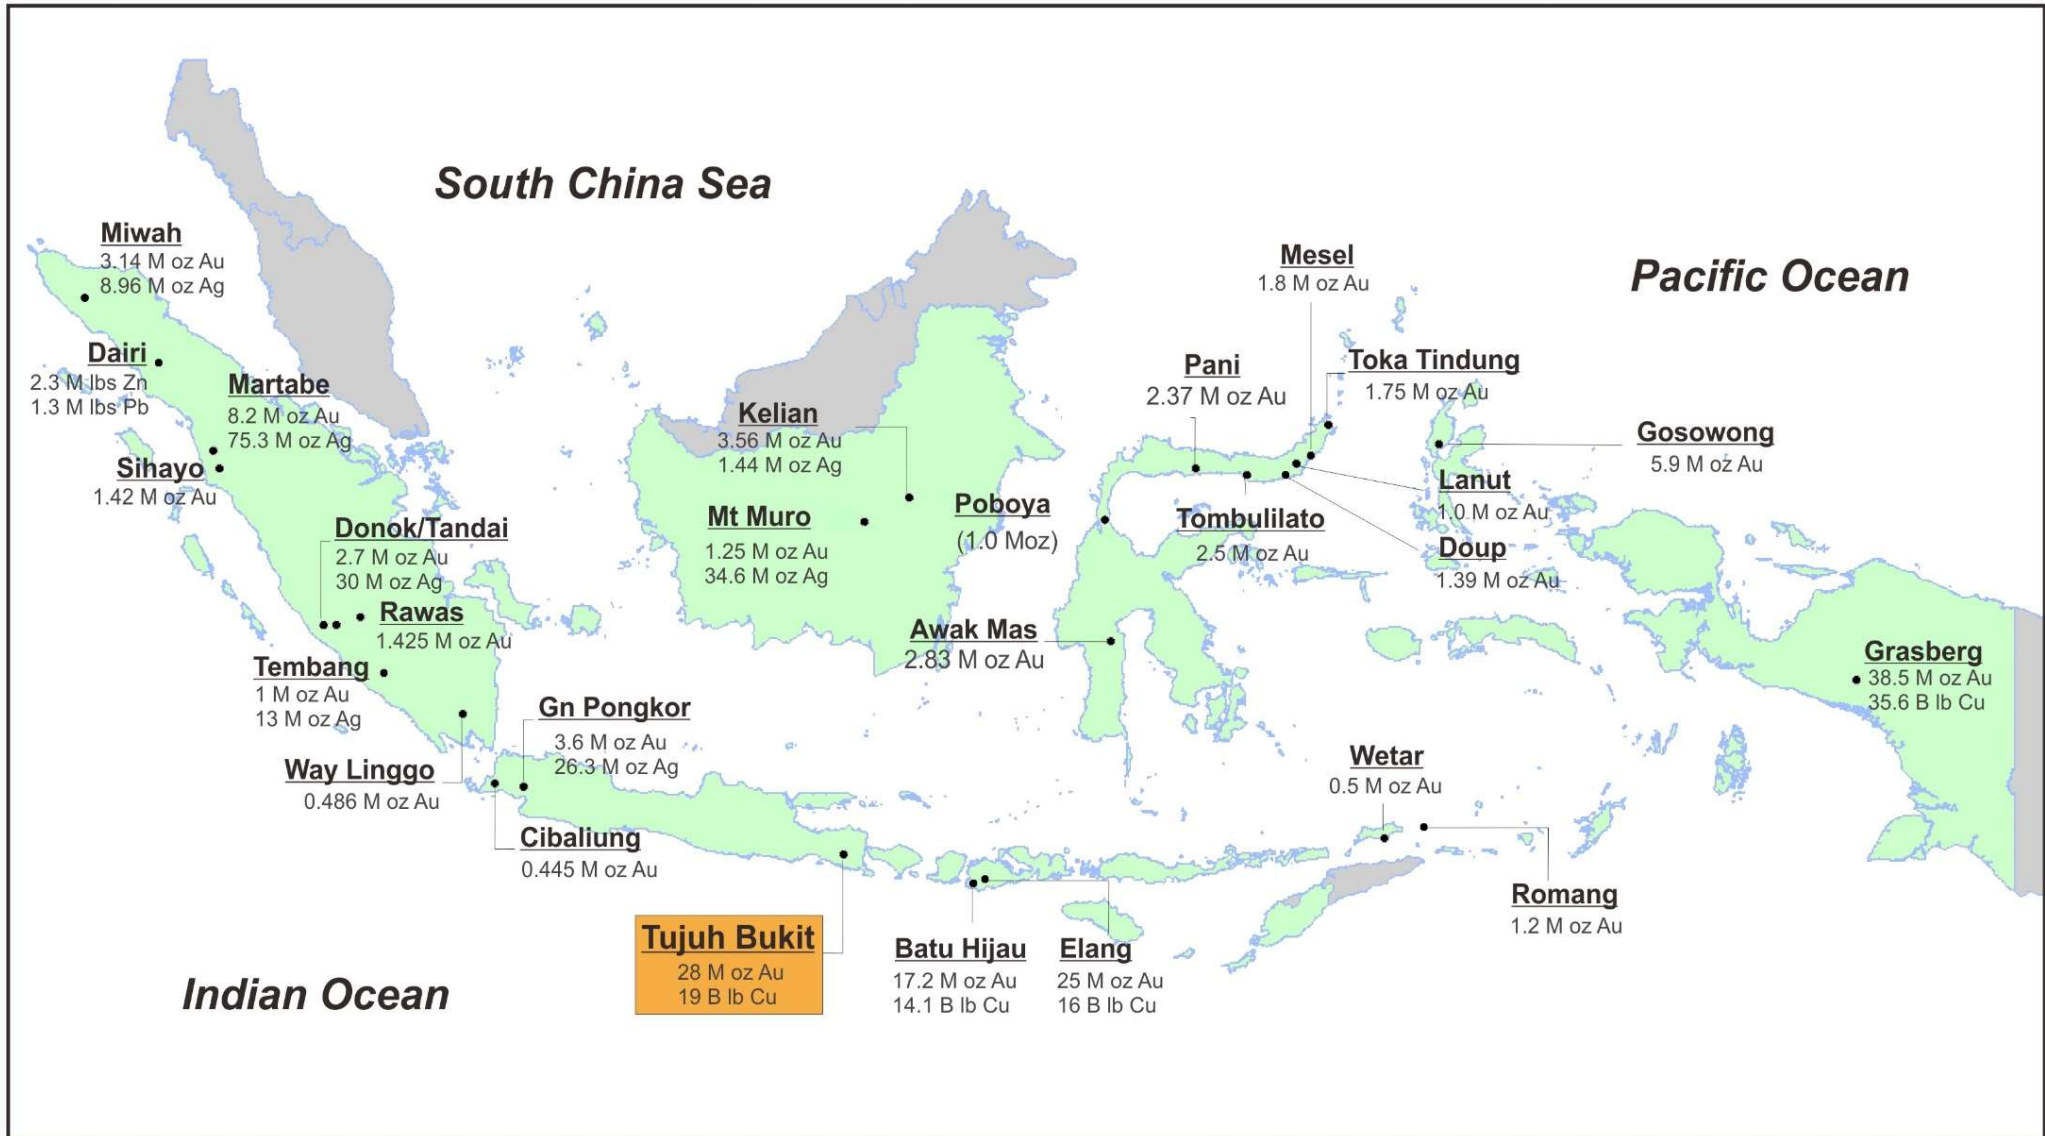

Merdeka have unequivocal and clear title over the Tujuh Bukit Project

- Very different ownership structure compared to Intrepid which was a nominee agreement with two individuals
- Global banks have completed Due Diligence and lent US\$150 million to support development of the Gold Heap Leach
 - BNP Paribas, HSBC, SocGen, Pierfront (Tamasek Holdings and Sumitomo Mitsui Banking Corporation)
- Listed on the Indonesian Stock Exchange (IDX)

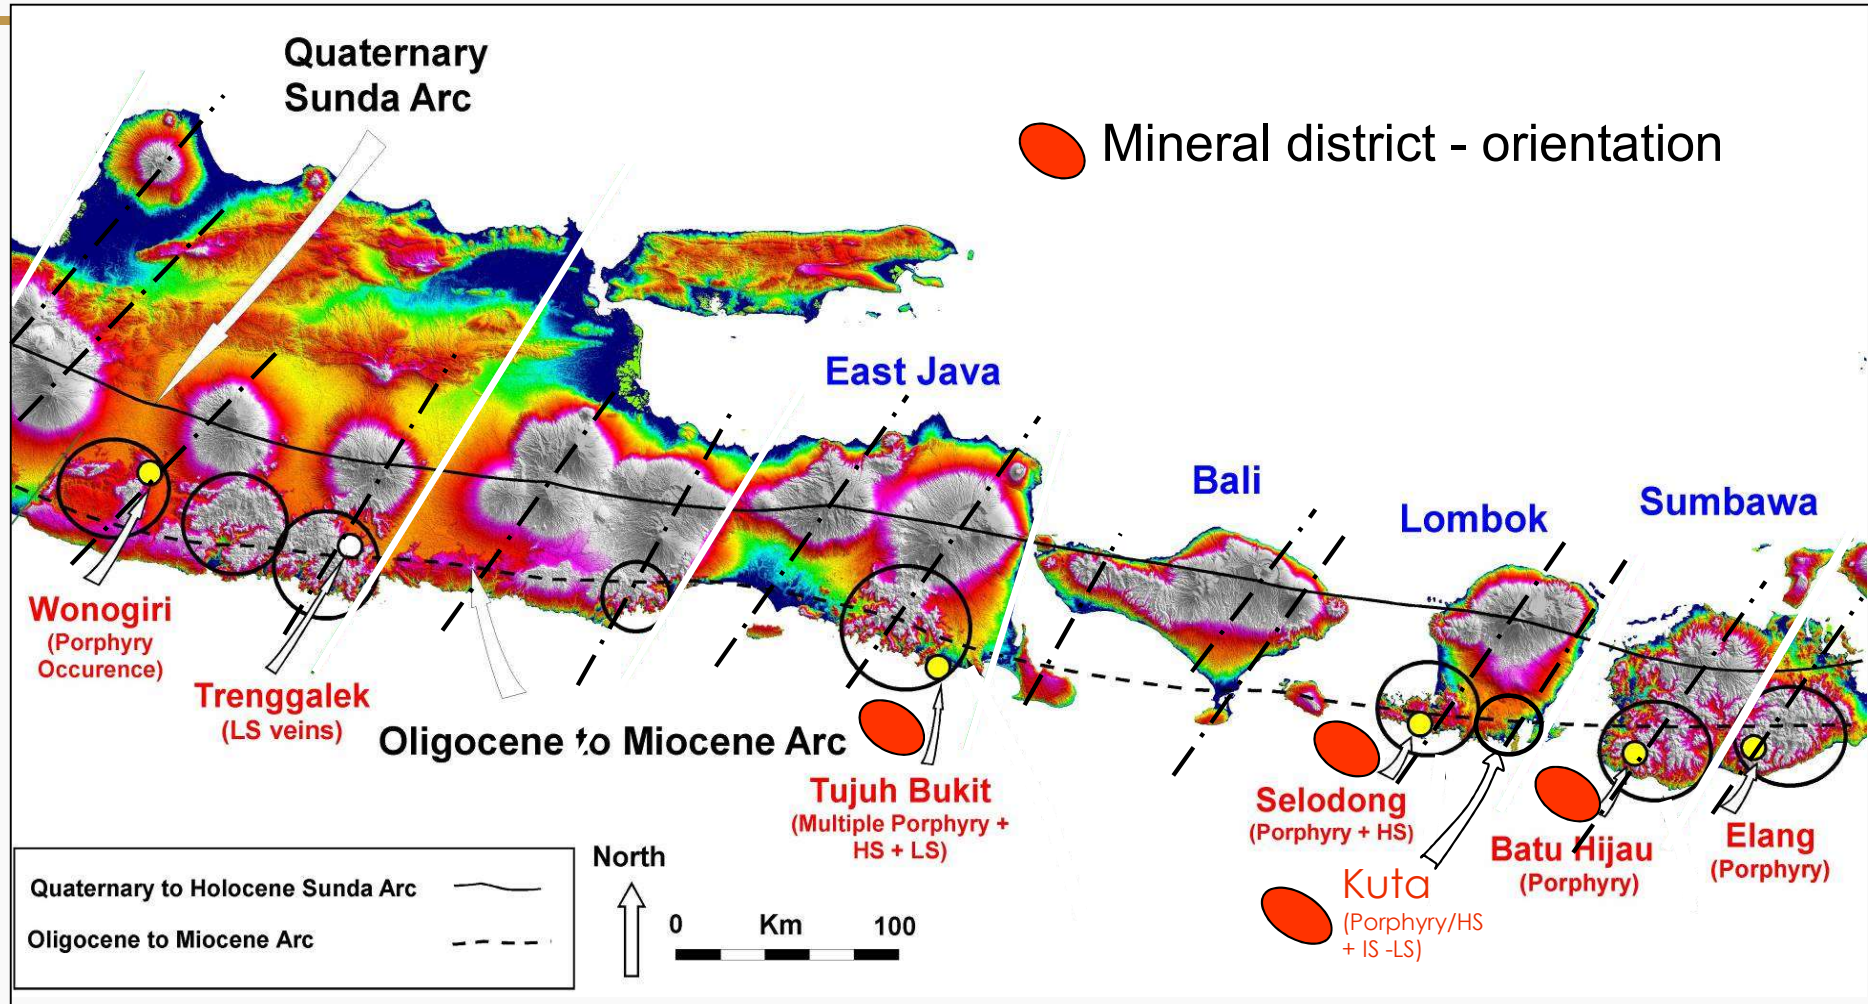

Location

Project Location, Banyuwangi Regency, East Java, Indonesia

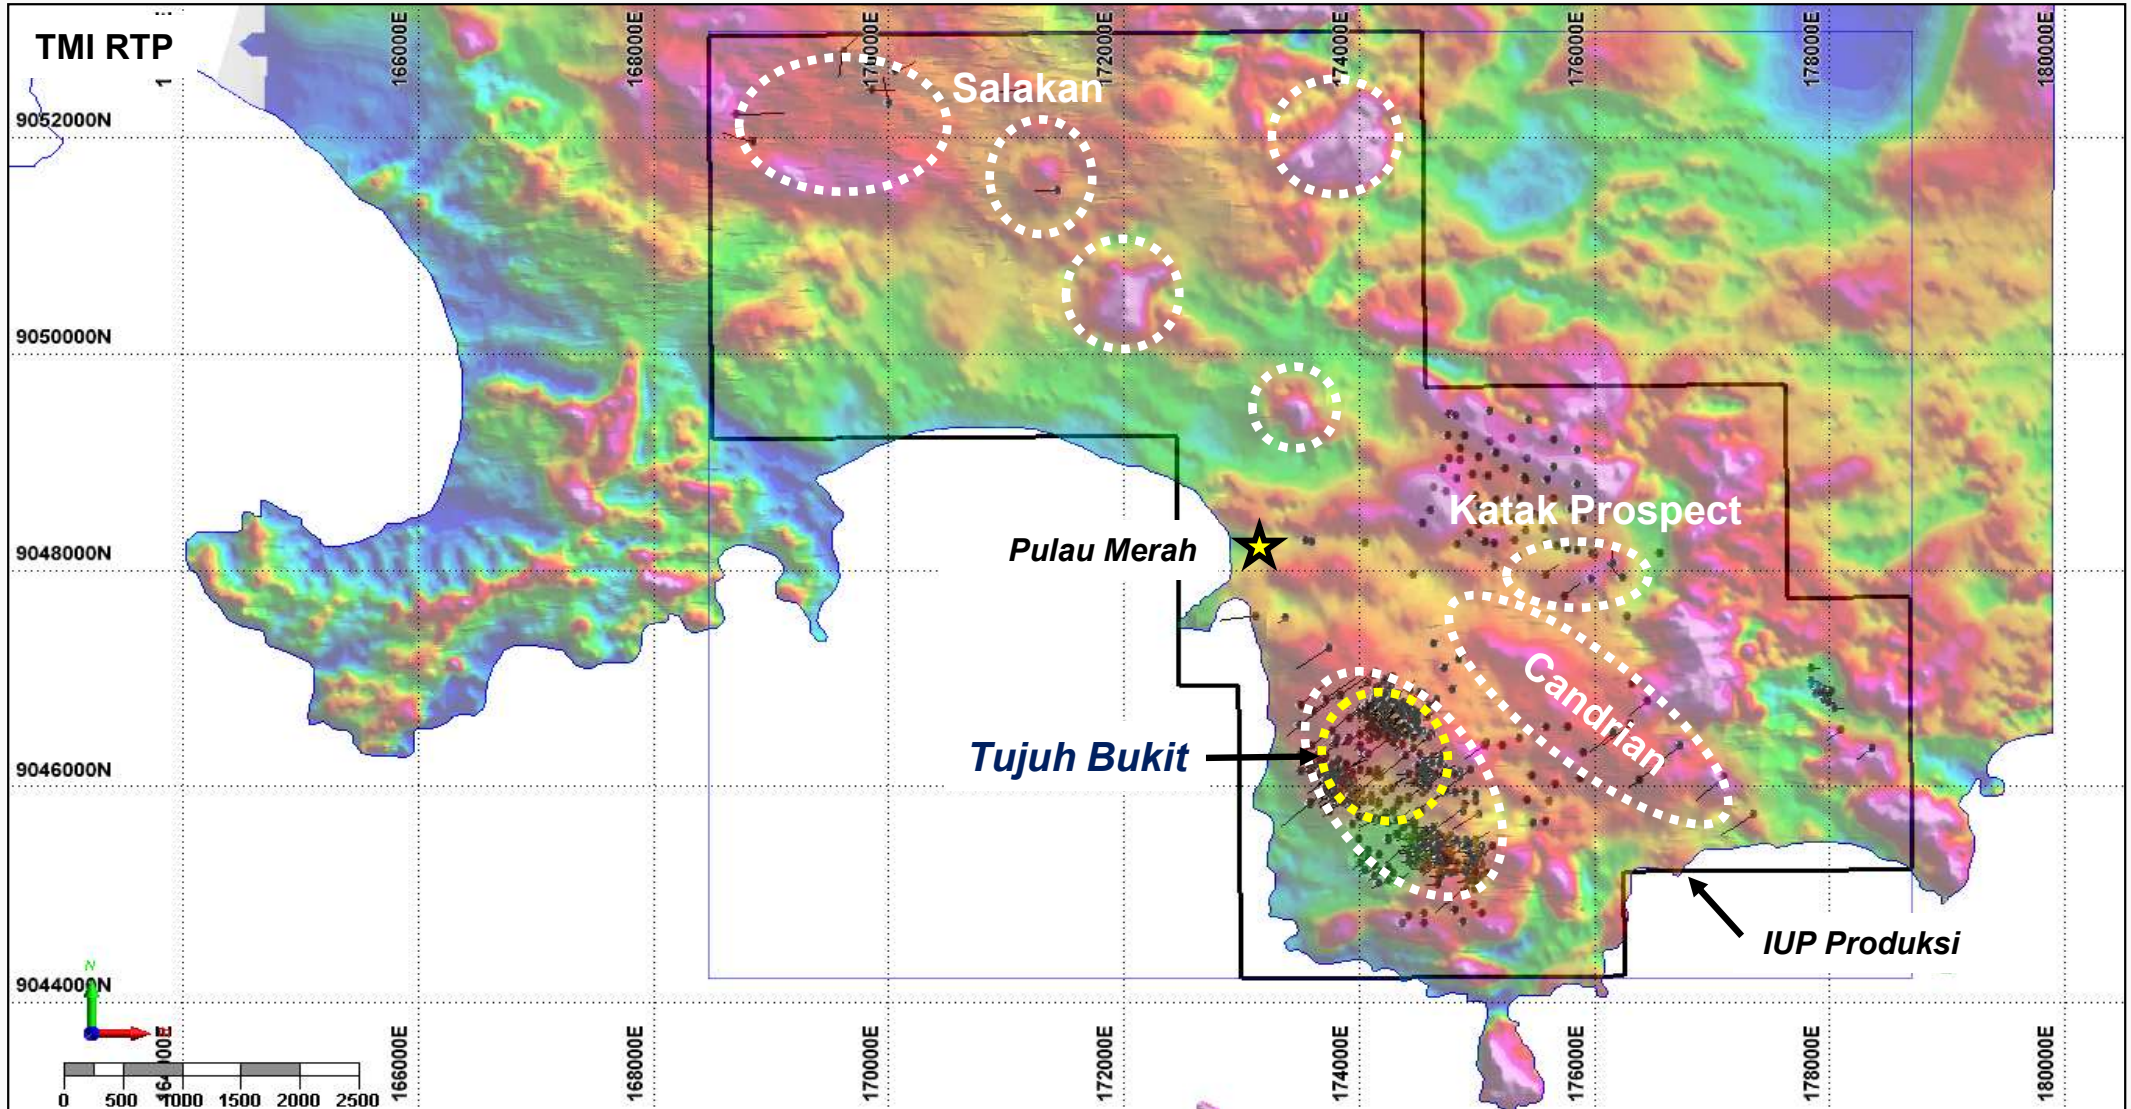

A good post code for big deposits!

Sunda-Banda Volcanic Arc – arc normal structures and age defined mineral belt

Tujuh Bukit IUP + Magnetics

- 4998 Ha, Initial currency through to 2030.

Oxide Project – P+P Reserves

36 Mt @ 1.03 g/t Au & 21 g/t Ag

“UHGZ” - Subset of Porphyry Inferred Resource

200-300 Mt @ 0.7-0.9 % Cu + 0.7-0.9 g/t Au

Tujuh Bukit Porphyry – All Inferred Resources

1.9 Bt @ 0.5 %Cu + 0.5 g/t Au + 93 ppm Mo

~ 19 billion lbs Cu & 28 million oz Au

September Quarter Update - Highlights

1. Record production of 53,260 ounces of gold at an all in sustaining cost of US\$416 per ounce.
2. Nameplate production rate of 4 million dry tonnes crushed and staked achieved in August 2017.
3. All operating and cost parameters in line with or better than plan year to date.
4. Achieved 4.6 million hours lost time injury free with zero LTI's and no reportable environmental incidents.
5. Development projects including Oxide Expansion PFS and Porphyry Copper Concept Study progressed well.
6. Full year gold production guidance increased to 110-120 thousand ounces at an AISC of between US\$520-570/oz.
7. Merdeka joins takeover bid for Finders Resources Limited, owner of the Wetar copper mine.

September 2017 Quarter – 53,230 Ounces Produced

	Unit	June Qtr 2017	September Qtr 2017	Variance
Open Pit Mining				
Ore Mined	Tonnes	924,263	1,172,340	2,429,488

Financial Analysis	Value
Internal Rate of Return (IRR), after tax	40%
Avg EBITDA	USD 68 m
Gold Royalties (%)	3.75
Gold price assumption (USD/oz)	1,200
Silver price assumption (USD/oz)	17
Payback period production yrs (after tax)	2.2

Oxide Heap Leach Mine

Indicative Production Profile and Cash Op. Costs incl. royalties

- The following table reflects a constrained 4Mtpa operation. Potential to grow the ore reserve and increase the production rate after year 3.

- Oxide ore metallurgy gold recovery 82.5%
 - Oxide ore approximately 93% of ore feed
 - 75mm crush size and cement agglomeration @ 4.5kg per tonne
 - ~ 50% - 80% of gold recovery achieved within 30 days of leaching

LT Price Assumptions: Gold \$1,250/oz, Silver \$15/oz
 1. Including silver credit

Open Pit Mining - Pit B West

Aerial view of the Ore Preparation Plant

Aerial view of the Heap Leach Pad

Aerial view of the ADR Plant

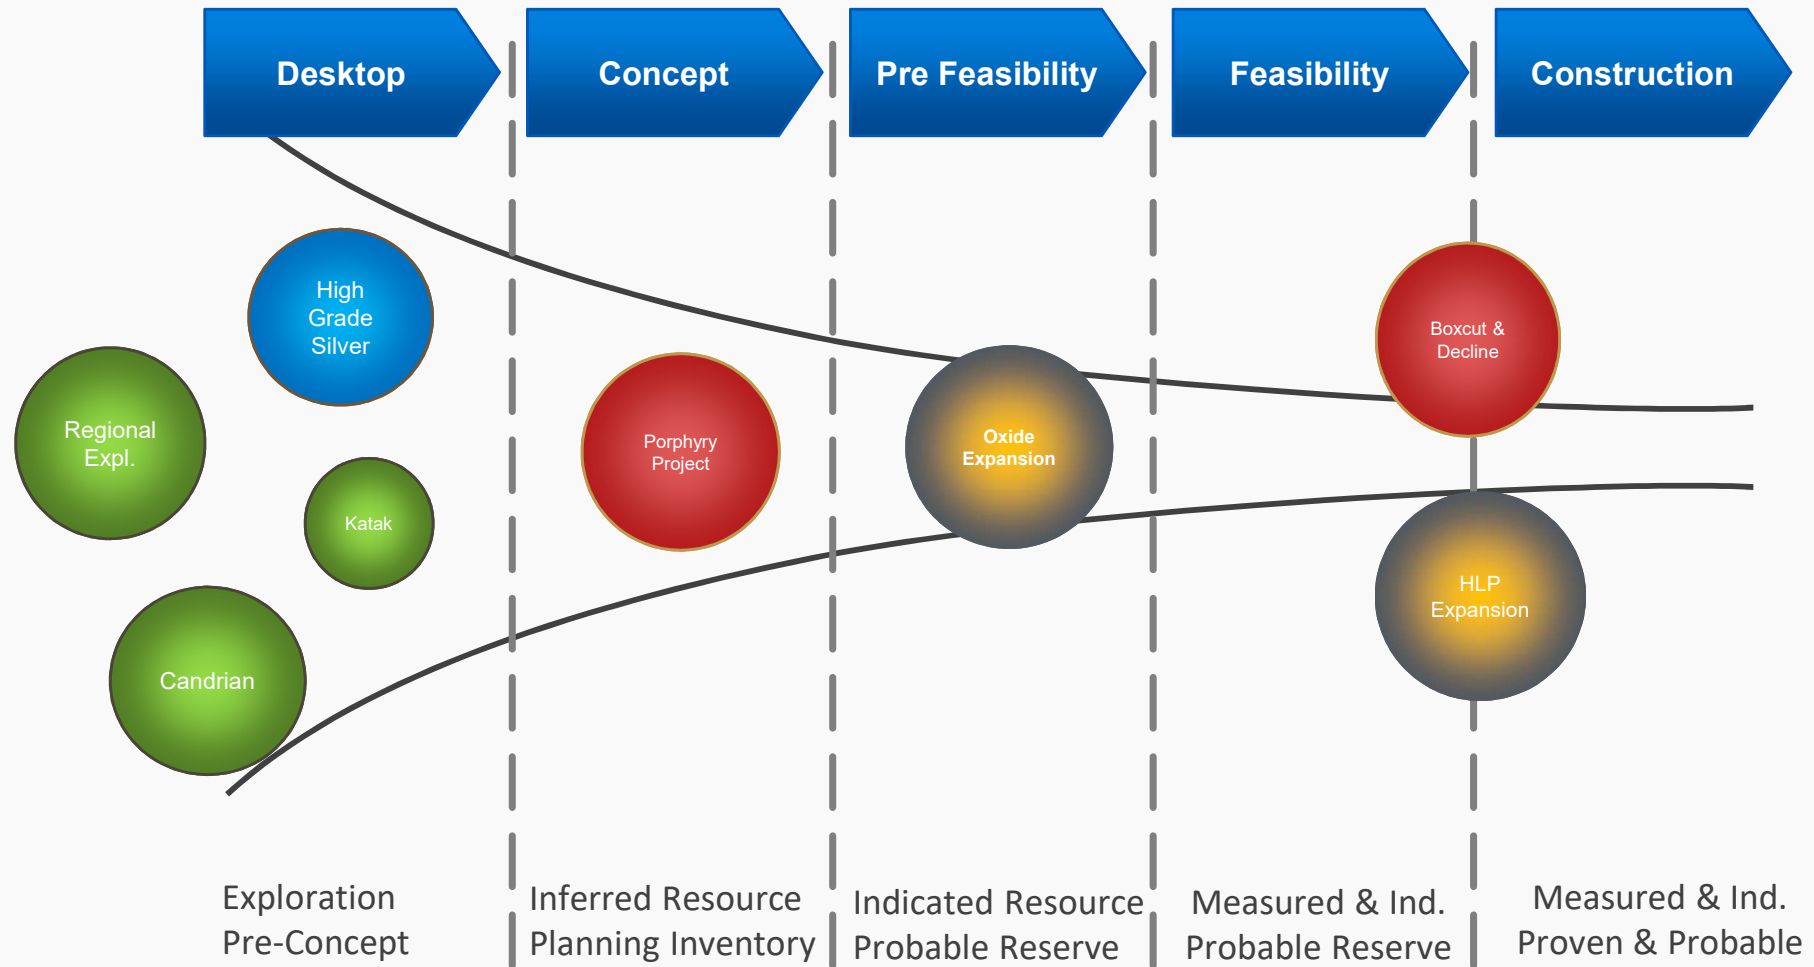

New employee recreational and messing facilities

Rehabilitation works well advanced across the site

4. Tujuh Bukit Development Projects Pipeline

Oxide Expansion Study

Current reserves only exploit 50% of the oxide resource

- Ore Reserves are constrained by the designed 36Mt heap leach pad capacity a 9 year mine life.
- Expanding the heap leach pad capacity to 50Mt is estimated to cost ~\$17M LOM and enable the ore stacking rate to be increased from 4 to 6Mtpa.
- The Oxide Expansion Project (OXP) was initiated to evaluate opportunities to increase the project value and the reserves based on a 50Mt leach pad.
- PFS Outcomes expected to be finalized in Q4 2017.

4. Porphyry Underground Project

Porphyry Project

Initial focus on Upper High Grade Zone within Global Resource

World Class Mineral Resource

Comparison with other regional projects

Staged Development Concept

1. Subdivide UHGZ into 4 x “digestible chunks” of ~80Mt each
 - 4 Blocks (East, North, West, South)
 - Complete staged studies in to the Mining blocks
2. Prioritize highest value block (East)
3. Exploration decline designed to provide underground access for;
 1. Resource definition drilling
 2. Rock mass studies, met sampling and other data acquisition required to support a high quality PFS.
4. Initial focus on high value East block
5. Staged capital spend profile for mine, mill and surface infrastructure
 1. Concept 6Mtpa then expand to 12Mtpa

Next Steps

1. Complete updated concept study (Q4,2017)
2. Pre-engineering, permitting and underground mining contract award (Q4,2017)
3. Boxcut establishment and contractor mobilization (Q4, 2017)
4. Decline development 2018
5. Drilling program and PFS 2018/2019
6. Maiden Ore Reserve supported by PFS targeted 2020

5. FND Takeover Bid

- Special Purpose Vehicle, Eastern Field Developments, jointly owned by Merdeka, Provident and Saratoga have launched a cash takeover bid for Finders Resources Limited (ASX:FND)
- Eastern Field believes it can utilise the experience and capabilities gained from the successful development of Tujuh Bukit to extract more value from the Wetar Project.
- Our participation in this takeover will not distract from our core focus of optimising value from Tujuh Bukit.
- Merdeka believes the A\$0.23 cash per share offer is fair value and provides Finders shareholders with the opportunity to lock in certain all cash value while removing the Indonesian operational and regulatory risks associated with the Wetar project.

Terima kasih!

1. Record production of 53,260 ounces of gold at an all in sustaining cost of US\$416 per ounce.
2. Nameplate production rate of 4 million dry tonnes crushed and staked achieved in August 2017.
3. All operating and cost parameters in line with or better than plan year to date.
4. Achieved 4.6 million hours lost time injury free with zero LTI's and no reportable environmental incidents.
5. Development projects including Oxide Expansion PFS and Porphyry Copper Concept Study progressed well.
6. Full year gold production guidance increased to 110-120 thousand ounces at an AISC of between US\$520-570/oz.
7. Merdeka joins takeover bid for Finders Resources Limited, owner of the Wetar copper mine.
